

- Lord Hill-Norton, a five star Admiral and former head of the Ministry of Defense in Great Britain has assured us that, even though, he now knows such projects exist, he was never informed about them as head of the MOD or M15.

Of course, we have not queried the congressional intelligence committees, and will do so as you suggested. But given past experiences we would be surprised to find that they had been briefed on this matter, although this remains a possibility.

An Air Force source has told us that deep black projects can escape any direct oversight by having funds "hidden" in other projects. For example, \$1 billion may be allocated for secret aerospace research and development, with certain projects cited as beneficiaries of this funding. In reality, however, \$600 million may be used for the 'acknowledged' secret projects while the remaining \$400 million is used for 'unacknowledged' projects.

Many of these projects have been largely 'privatized' by multi-billion dollar military contractor corporations. R&D on the extraterrestrial matter is funded through 'profits' or revenue built into lucrative contracts with the government on 'acknowledged' projects. This, then, creates an indirect source of government funding inasmuch as the funds used for UFO/ET research is derived from 'profits and overhead' related to legitimate projects.

These projects are global in scope and transcend both the boundaries and control of the US government. Similarly, funding is from global, i.e. foreign sources, as well as domestic and private sources.

One member of the 'control group' dealing with this matter has told us that there are 'creative ways' of funding such things out of the international monetary system, including the process of rounding off transactions so that the far decimal amounts (.00099) are placed in secure accounts for such funding purposes. This individual, who runs a major global supercomputer firm, states that this is easily done with current supercomputing technologies.

More than one source has stated that certain illegal activities by the military and CIA, such as drug trafficking, have been used to generate revenue for deep black projects.

I hope the enclosed list of facilities and projects will be helpful to your inquiry. It is by no means exhaustive, but reflects the best information to date which our team has been able to collect.

Please feel free to contact me at any time should you have any questions or comments.

Sincerely,

Steven M. Greer, MD
Director of CSETI
